

Open Source Medical Supplies

LOCAL RESPONSE STYLE GUIDE

Using the Open Source Medical Supply branding is a simple way to show your connection to our global community. Using these logos (for example, as social media images or in documents) can help others to identify you more easily and connect you to the larger global project.

A template file for localized logos is available [here](#).

We request you add your location name in Montserrat (Regular weight, capitalized, color #2B3B4F), which can be downloaded from [google fonts](#).

For the vertically stacked logo, scale the font size to justify-align the name of the city with the letters "OSMS." For the horizontal logo, left-justify the city name after the vertical bar.
